● Organobalance to exhibit at Vitafoods Europe 2017 in Geneva

From May 9-11, you have the opportunity to meet Organobalance's Sales and Business Development team at Vitafoods Europe, the global nutraceutical event. At booth B59, Organobalance's successful health branded ingredient Pylopass™ will be showcased. This patented bioactive has been developed through a multi-year screening and it can help to restore the gastric microflora. Pylopass™ specifically binds with *Helicobacter pylori* and its gastric health benefits have been proven in five published clinical studies to date. This ingredient is marketed by leading dietary supplements companies in the Americas, Europe and Asia, and several successful market examples will be shown at the booth.

On Wednesday the 10th of May at 11 AM, Organobalance's Commercial Director, Gilles Jequier, will present the latest clinical evidences supporting the use of Pylopass™ at a conference held at the International Probiotics Association (IPA) booth J139.

About Organobalance GmbH:

Organobalance GmbH is a biotechnology research and development company with facilities in Berlin and Flensburg. Founded in 2001, the firm develops and markets products based on probiotic bacteria cultures as well as yeast production strains for use in industrial biotechnology. One of its best-known products is Pylopass™, a natural lactobacillus agent against *Helicobacter pylori*, a stomach bacterium. Among the company's German and international customers are clients from the food, cosmetics, feed, agriculture, and pharmaceutical industries. The company owns an extensive collection of yeast and lactobacillus cultures, some of which date back to the 1920s. Christine Lang, the company's Managing Director, is also a Professor of Microbiology and Molecular Genetics at the TU Berlin and has received several business awards. She also chairs the German Bioeconomy Council. Organobalance GmbH is part of Novozymes A/S since September 2016.
